

CloudEndure Migration

Simplify and expedite your migration to AWS

What Is CloudEndure Migration?

[CloudEndure Migration](#) is a free, highly automated lift-and-shift migration solution. It simplifies and accelerates the migration of physical, virtual, and cloud-based servers to AWS. You can use CloudEndure Migration to migrate your business-critical databases, including Microsoft SQL Server, Oracle, and MySQL, as well as enterprise applications such as SAP. Perform on-time, on-budget, large-scale migration projects with minimal performance impact and short cutover windows.

Flexible

- Migrate physical, virtual, and cloud-based servers
- Replicate enterprise databases such as Microsoft SQL Server and Oracle, and applications such as SAP

Any Application From Any Source

Reliable

- Enable non-disruptive, continuous replication
- Run unlimited tests prior to cutover
- Meet strict security requirements for regulated environments

Minimal Business Disruption

Highly Automated

- Reduce time-intensive and risky manual processes
- Minimize cutover windows
- Easily integrate with migration factories and cloud COEs

Thousands of Machines in Parallel

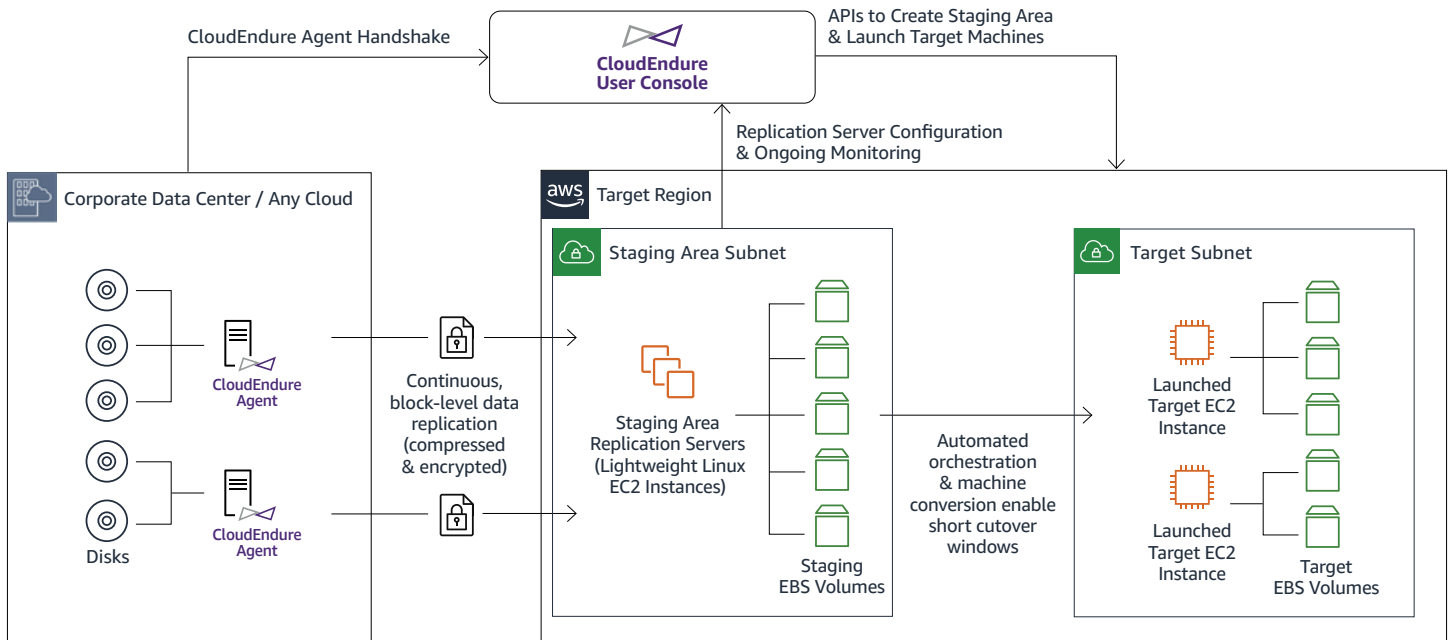

“CloudEndure Migration was able to provide a cutover window that no one else could.”

Stuart Lupton, Lead Cloud Architect at DB Systel UK

CloudEndure Migration helped [DB Systel UK](#) exit their data center ahead of schedule. DB Systel UK used CloudEndure Migration to accelerate migration of physical and VMware-based machines to AWS. As part of this project, they moved write-intensive Microsoft SQL Server and Oracle databases, as well as business-critical legacy applications that were running on Microsoft Windows, Red Hat, and CentOS operating systems.

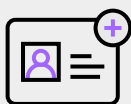

How CloudEndure Migration Works

CloudEndure Migration continuously replicates your source machines into a lightweight staging area in your AWS account without causing downtime, impacting performance, or requiring a reboot. When you're ready to perform a cutover, click a button in the CloudEndure User Console to launch up-to-date, fully operational workloads on AWS in minutes.
